Technology: what, and from who?

Who has the technology?

Need quantum emulation code?

- Q.js, Silq, QCL: quantum computer language, most work in a variety of IDEs.
- Quantumcomputing.com allows running and testing software.
- Limited access to actual quantum computers.

Need GPU access?

Some sites allow free time to develop and test:

- Google Cloud platform
- NVIDIA GPUDirect.

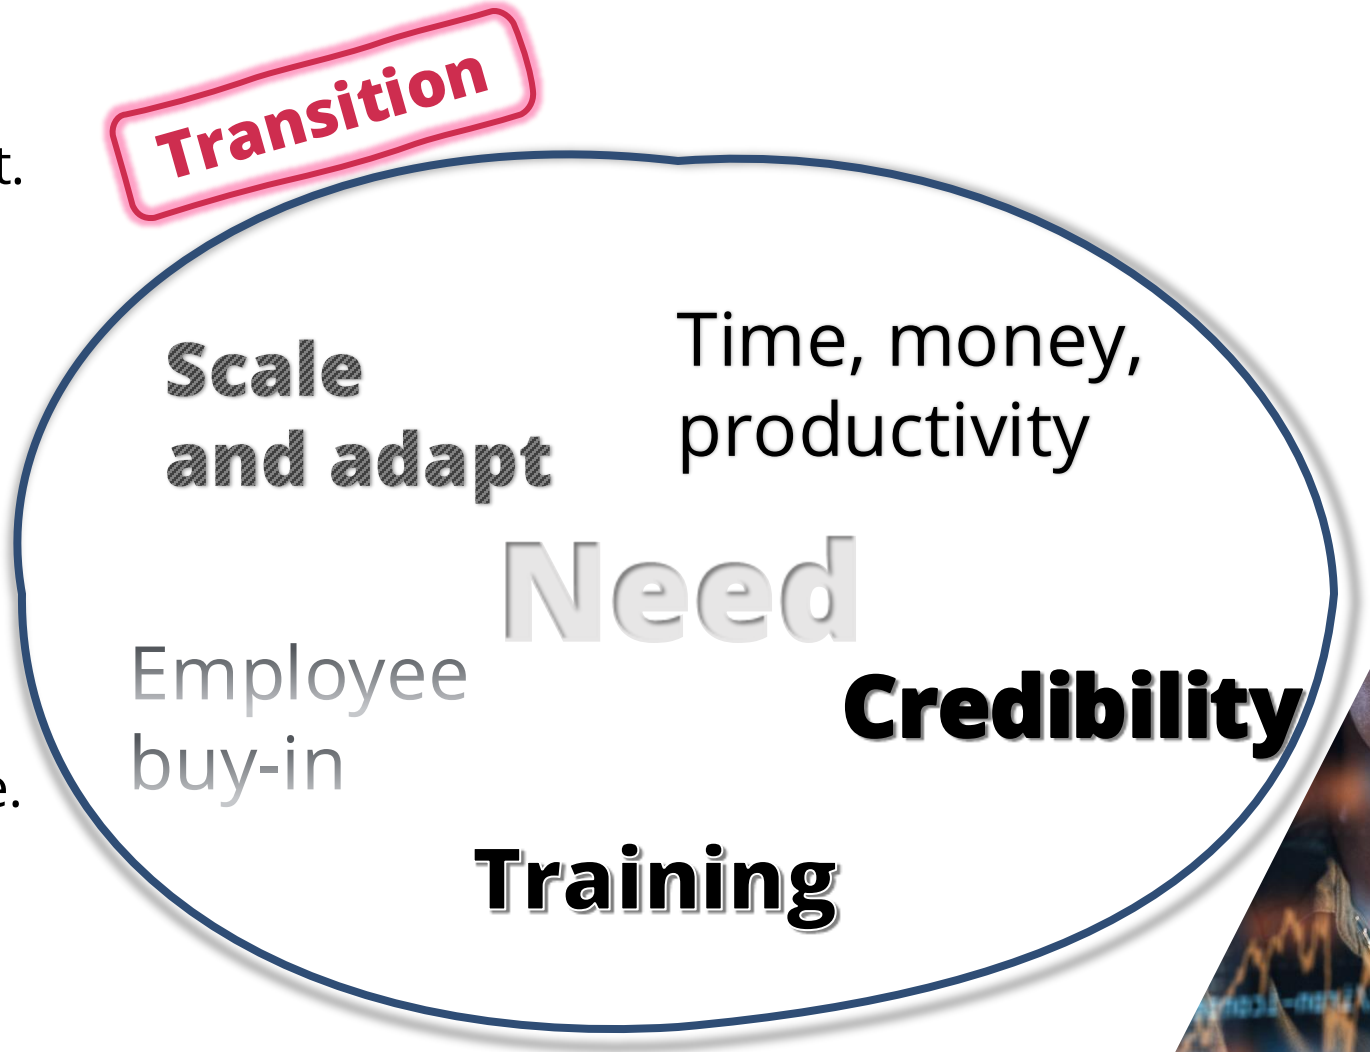

Cost versus risk

- purchasing now might not be best plan.
- integration costs.

Choosing the right technology

- Businesses vary and have different needs: need comes first.
- Choose options to grow.
- Make backup plans.
- Get support and training.
- Transition plans are essential to run smooth; do not forget the Strangler pattern.
- All technology reaches end of life.

Finding consultants

Sometimes new tech means a new expert:

- academic journals
- conferences
- research.

Conduct a technology experiment.

Find a community of practice:

- DevOps Institute®
- MLOps Community
- Quantumcomputing.com.

Tips

- Learn without restrictions.
- Engage in discussion.
- Suggest paths to improve.
- Chat with peers.
