Introduction

The AWS Migration Competency Consulting Partner Validation Checklist is intended for APN Partners ("Partners") who are interested in applying for AWS Migration Competency. This checklist provides the criteria necessary to achieve Migration Competency for APN Consulting Partners, under the AWS Competency Program.

The goal is to recognize APN Partners who help customers migrate workloads to AWS while taking advantage of AWS's security and architectural best practices.

Partners undergo a validation of their capabilities upon applying for AWS Migration Competency, and every 12-24 months thereafter.

AWS reserves the right to make changes to this document at any time, but will do so with effective version control, by including a summary of changes with each document released after Version 1.0. It is expected that APN Partners will review this document in detail *before* submitting an application for the AWS Migration Competency, even if all of the pre-requisites are met. If items in this document are unclear and require further explanation, please contact your AWS Partner Development Representative (PDR) or Partner Development Manager (PDM) as the first step. Your PDR/PDM will contact the Program Office if further assistance is required.

Competency Application and Audit Process

In order to schedule the validation, Partners must submit the Competency application by following the steps outlined below:

- Step #1: Review AWS Migration Competency: Consulting Partner Validation Checklist
- Step #2: Submit AWS Migration Competency Application through the APN Portal
  - Login to the APN Portal
  - Click "View My APN Account" in left navigation
  - Scroll to AWS Competencies and select Migration Competency
  - Complete the Migration Competency Application

Once your firm's application has been submitted through the APN Portal, the APN Team will review for compliance, then send the application to an AWS Partner Solutions Architect for technical review.

AWS recommends that Partners have individuals who are able to speak in-depth to the requirements for the technical review.

Program Requirements

Migration Competency Partners provide solutions or have deep experience helping businesses move successfully to AWS, through all phases of complex migration projects, discovery, planning, migration and operations. They focus on developing their customer's internal skills and helping to build the foundations required for complex migrations to AWS. They are experts in reducing friction when migrating legacy applications.

AWS Migration Competency – Consulting Partner Requirements		
APN Membership	Complies with Advanced tier+ APN Consulting Partner requirements	
AWS Support	Business level+ (view Support plans)	
AWS Customer References	≥ 5 AWS Customer References specific to completed Migration projects of 10 applications or more: ▪ 2 of the 5 AWS Customer References must be public (i.e. case study, architecture documentation, whitepaper, blog post, etc.)	
AWS Migration Practice	AWS Migration Practice or Solution • Migration practice targeting AWS • Public reference to solution, tools, and guidance on Migration • Pass technical review by AWS Solution Architects • Recommends AWS Security Best Practices	
AWS Migration Category *(Must meet requirements of one to achieve Competency)*	*Migration Consulting* • ≥ 10 AWS Certifications in total ○ ≥ 2 Professional Level AWS Certifications • Must hold AWS DevOps Competency	*Migration Delivery* • ≥ 30 AWS Certifications in total ○ ≥ 8 Professional Level AWS Certifications • Must be Audited AWS Managed Service Provider and/or hold the AWS DevOps Competency • Provides professional services to perform migrations on behalf of customers • Provides project management functions for migration projects

AWS Migration Competency Partner Validation Checklist

In preparation for the validation process, Partners should become familiar with the items outlined in this document, and prepare objective evidence, including but not limited to: prepared demonstration to show capabilities, process documentation, and/or actual customer examples.

Please review by the Migration category your firm wishes to apply for (Migration Consulting or Migration Delivery).

Migration Consulting

Migration Competency Partners provide solutions or have deep experience helping businesses move successfully to AWS, through all phases of complex migration projects, discovery, planning, migration and operations.

Consulting partners provide expertise and training to help develop their cloud capabilities. These partners will provide DevOps, application, and environment modernization consulting to set customers on the path to success.

1.0 AWS Customer References		Met	Not Met
1.1 Customer References	1.1.1 Partner has five (5) AWS customer references of completed Migration projects for mid-market or Enterprise customers. 2 of the 5 references must be public. References include: ▪ Name of Customer and AWS Account ID ▪ State of their business prior to your engagement ▪ Problem statement/definition ▪ What you proposed ▪ Outcome(s) ▪ AWS services used ▪ Third party applications or solutions used ▪ Number of distinct applications migrated ▪ Number of source VM's and number of resulting AWS instances		
1.2 Security Best Practices	1.2.1 References must show how migrated environment were deployed against AWS Security Best Practices.		
1.3 Completion	1.3.1 References must show completed projects.		

Migration Delivery

Migration Competency Partners provide solutions or have deep experience helping businesses move successfully to AWS, through all phases of complex migration projects, discovery, planning, migration and operations.

Delivery partners accelerate customer cloud adoption by providing technical personnel, tools, education, and technical support to customers in the form of professional services. These partners either are, or have a relationship with an AWS certified Managed Service Provider to help customers with ongoing support of AWS workloads where required.

2.0 AWS Customer References		Met	Not Met
2.1 Customer References	2.1.1 Partner has five (5) AWS customer references of completed Migration projects for mid-market or Enterprise customers. All references must be public. References include: ▪ Name of Customer and AWS Account ID ▪ State of their business prior to your engagement ▪ Problem statement/definition ▪ What you proposed ▪ Outcome(s) ▪ AWS services used ▪ Third party applications or solutions used ▪ Number of distinct applications migrated ▪ Number of source VM's and number of resulting AWS instances		
2.2 Professional Services	2.2.1 References must be accompanied by a signed statement of work showing the scope and scale of professional services provided.		
2.3 Project Ownership	2.3.1 References must be accompanied by a project plan or RACI that shows the partner jointly or singly owned project management of the migration.		
2.4 Security Best Practices	2.4.1 References must show how migrated environment were deployed against AWS Security Best Practices.		
2.5 Completion	2.5.1 References must show completed projects.
